

Hazardous Chemical Register

To create the following Register information on the chemical name (*common name*) and the manufacturer details are very important. This will lead us to find the correct Safety Data Sheet (*SDS*) not one from another manufacturer. The following is a list of the hazardous substances held on the site. This register must be completed with **all** substances on site, check every location and every container. Please provide a floor plan of your site and identify the main storage areas with a number on the plan where the location is. Then create this register for each location, that will lead us to know what is stored in each location throughout the site and let us review the information and control the risk.

Location: _____

Compiled By: _____

Date: _____

Chemical Name <i>(what is it called)</i>	Manufacturer details <i>(emails etc if possible)</i>	Chemical Use	Maximum Quantity Stored <i>(container sizes eg 2 x 4lts etc)</i>	Storage Location <i>(mark on site plan – eg. Area 1, 2, 3 etc)</i>	Hazardous or Dangerous? <i>(DG / HS – will be identified in SDS or on container)</i>	Substance Class <i>(usually on the containers)</i>	SDS Date <i>(must be less than 5 yrs old – must have one)</i>
