

Daily Repositioning & Skin Inspection Chart

Date:

Surname:

Forenames:

DOB:Sex.....

Location:

- Commence a new chart at 0800 each day
 - Inspect skin at every positional change and document below
 - Encourage participant to reposition/mobilise where possible
 - Reposition the participant to reduce the risk of further damage, e.g. using the 30 degree tilt
 - Use manual handling aids to minimise risk of friction and shear e.g. glide sheets
 - Participants on any form of pressure redistribution equipment still require skin inspection and regular repositioning
 - Provide suitable seating including pressure redistribution cushions as required
- Repositioning instructions as per registered nurse/doctor:*
 Reposition/provide pressure area care at least every hours.
- Other instructions:**

Time	Repositioning (Use Codes) From To	Skin Inspection Comments	Action Taken	Signature or Initials
------	--	-----------------------------	--------------	--------------------------

Codes: L = left, R = right, B = back, P = prone (front), M = mobilised, S = seated

E.g. 08.00	L	S	Left Hip Non-Blanching	Reassess at next positional change	

Time	Repositioning (Use Codes) From To		Skin Inspection Comments	Action Taken	Signature or Initials
